1. Introduction

EduCheck is the Academic Record Validation and Consolidation System for public elementary schools. Subject teachers upload the DepEd e-Class Record (ECR) Excel files they already keep. EduCheck reads the grades, checks them against DepEd grading rules, and brings every subject together into each learner's consolidated record. Class Advisers review and submit those records, the School Administrator approves them, and the approved grades flow into the learner's permanent record (SF10-ES).

This manual explains how to use the EduCheck web application. Chapter 2 covers what every user does: signing in, finding your way around, notifications, settings and help. Chapters 3 to 6 each cover one role. Read Chapter 2 first, then the chapter for your role.

1.1 Who uses EduCheck

Role	What they do in EduCheck	Chapter
Subject Teacher	Uploads the e-Class Record of each subject they teach and fixes what EduCheck flags.	3
Class Adviser	Follows the section's uploads, reviews each learner's consolidated record, submits it for approval, and keeps the SF10.	4
School Administrator	Creates accounts, sets up sections and teacher assignments, approves submitted records, and manages school-wide settings.	5
Principal	Approves new accounts and role changes, and views records, progress and analytics. Records are view-only.	6

1.2 How a record moves through EduCheck

1. The **School Administrator** creates the accounts, the sections and the teacher assignments for the school year.
2. Each **Subject Teacher** uploads one e-Class Record per subject. EduCheck validates it right away.
3. The **Class Adviser** reviews the consolidated grades. A subject that looks wrong is sent back to its teacher with a reason.
4. When a learner's record is complete, the **Class Adviser** submits it.
5. The **School Administrator** approves the record or returns it with a reason.
6. Approved years appear on the learner's **SF10**, which the Adviser or Administrator can generate.

1.3 What you need

- A computer or phone with a current web browser (Google Chrome, Microsoft Edge or Mozilla Firefox) and access to the EduCheck address given by your school.
- The account issued by your School Administrator. Accounts use the person's DepEd email address (ending in @deped.gov.ph).
- For teachers: the official DepEd e-Class Record template in Excel (.xlsx or .xls), up to 10 MB, with the template's sheets and layout unchanged and an LRN for every learner.

2. Getting Started (All Users)

2.1 Signing in

Open the EduCheck address in your browser. The left side of the sign-in page lists who uses EduCheck and what each role does.

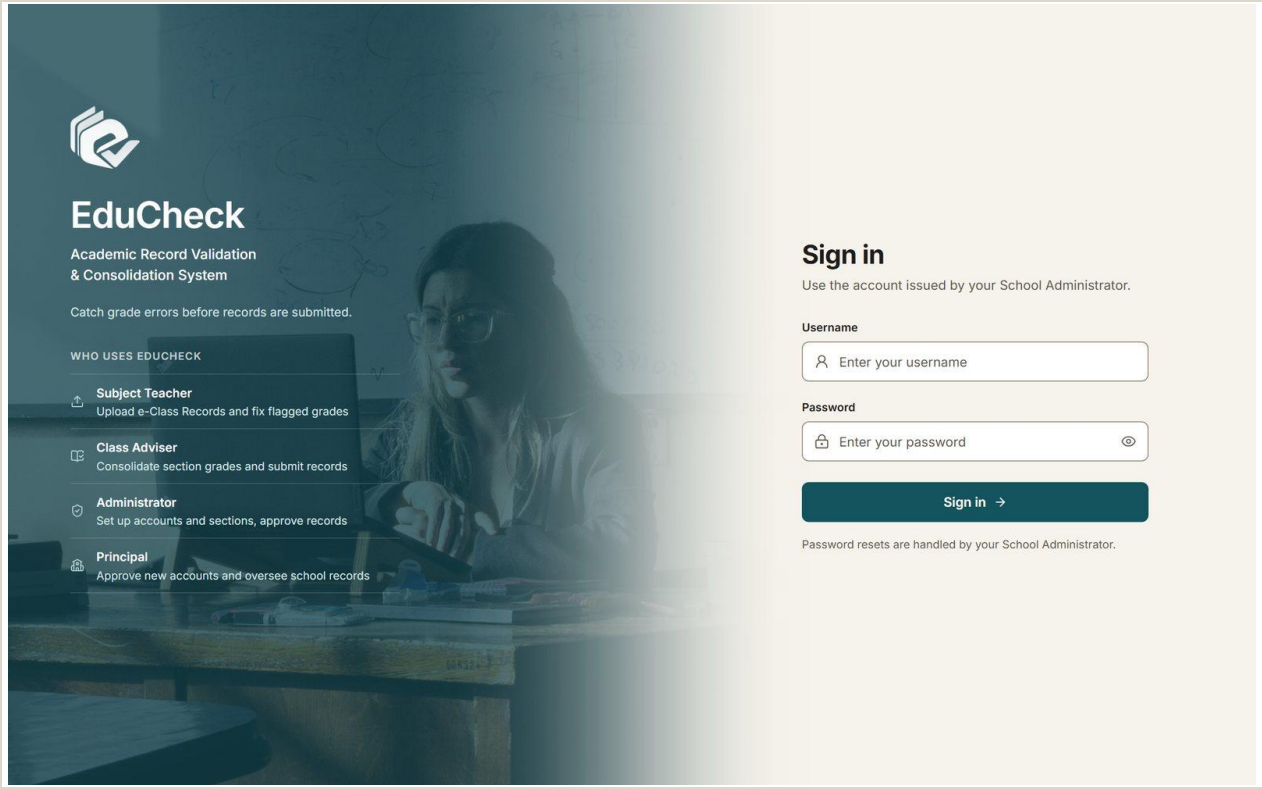

Figure 1. *The sign-in page*

1. Type your **Username** and **Password**. Click the eye icon to check what you typed.
2. Click **Sign in**.
3. If this is your first sign-in, or your password was reset, EduCheck asks you to replace the temporary password before anything else. Choose a password of at least 8 characters with a letter and a number.

> **Note**
> After 10 wrong attempts in 15 minutes, sign-in is paused on that device for 15 minutes. A new account cannot sign in until the Principal approves it and the School Administrator finishes its setup.

> **Tip**
> On a hosted server, the first sign-in after a quiet period can take up to a minute while the server starts. EduCheck shows a message when this happens; keep the page open.

2.2 The welcome guide

The first time you sign in on a browser, a short guide opens. It explains what your role does, lists the pages you will use in order, and shows where each one is in the sidebar. Click **Show me** to go through the steps, or **Skip** to close it. The last page has a button that takes you to your first task.

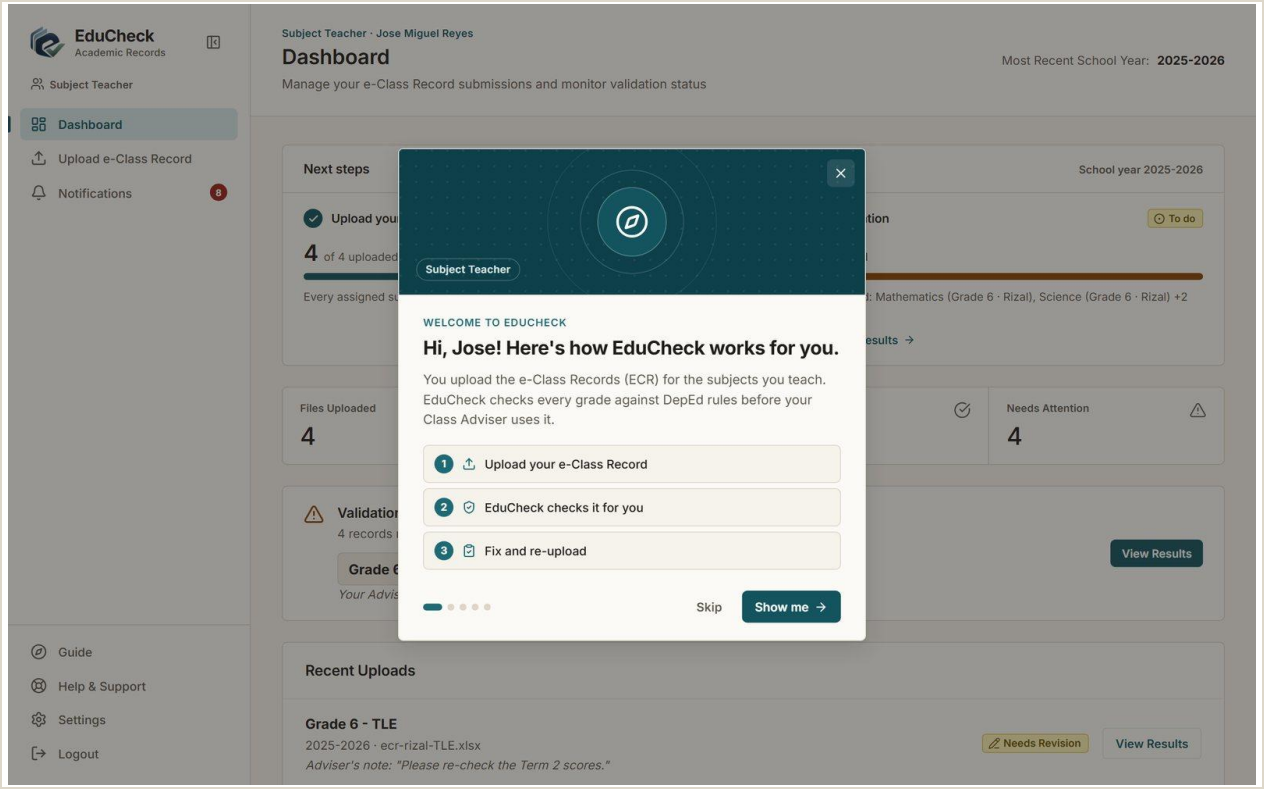

Figure 2. *The welcome guide, first page (Subject Teacher)*

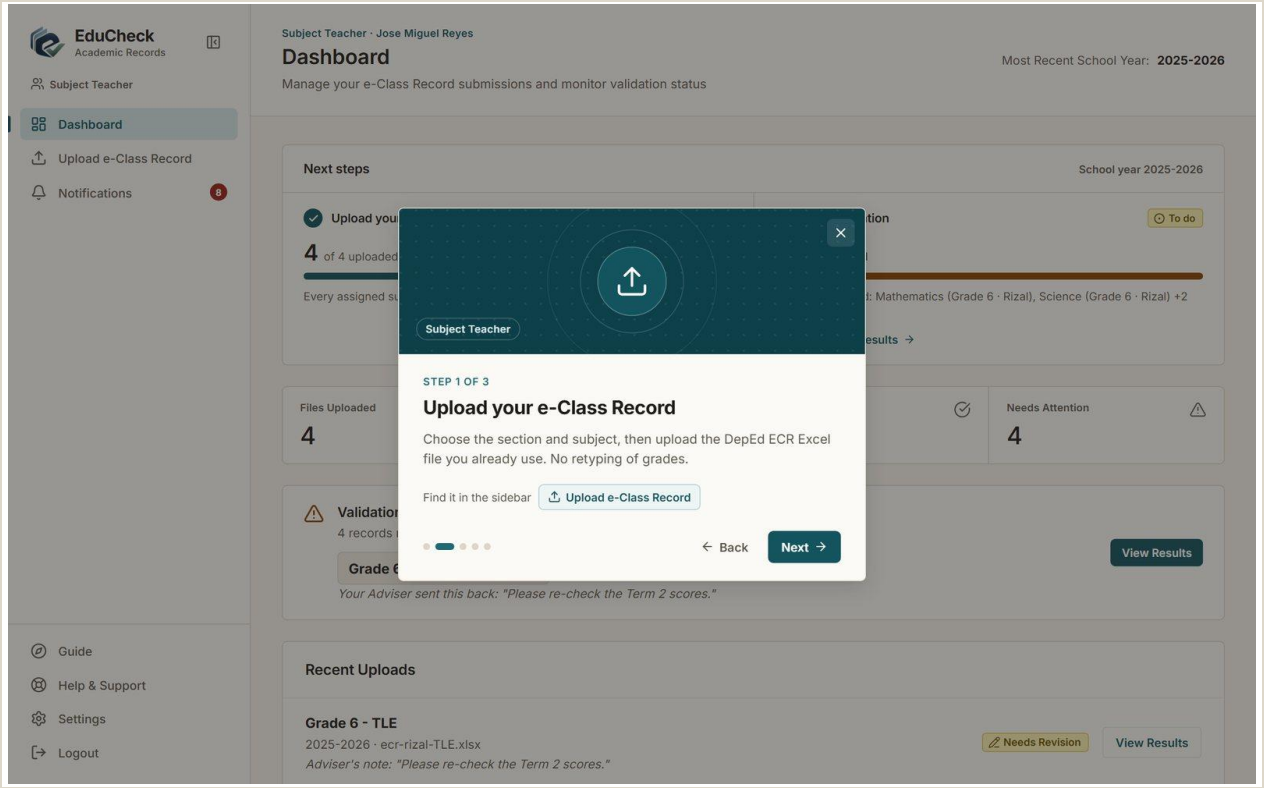

Figure 3. *A step of the welcome guide, with the sidebar item to use*

You can open the guide again at any time from **Guide** at the bottom of the sidebar.

2.3 Finding your way around

Every page has the same layout. The **sidebar** on the left lists the pages your role can open; the item you are on is highlighted. Its lower part holds **Guide**, **Help & Support**, **Settings** and **Logout**. The button beside the EduCheck logo collapses the sidebar to icons to give the page more room.

Many pages have a **School Year** selector at the top right. Pages open on the current school year; choose another year to see its records.

2.4 Notifications

EduCheck tells you when something needs your attention, for example when a record is returned, approved or submitted. The number beside **Notifications** in the sidebar shows how many are unread.

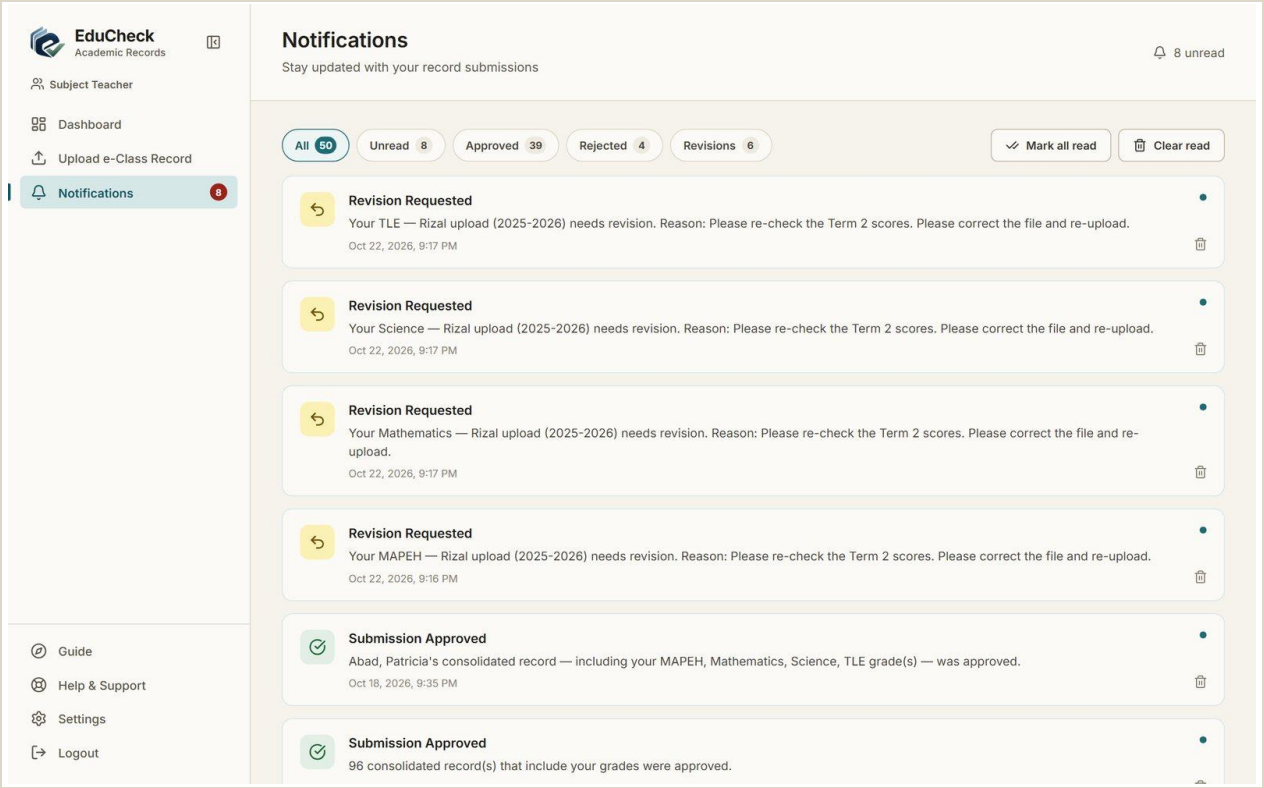

Figure 4. *Notifications, filtered with the tabs at the top*

- Use the tabs (**All**, **Unread**, **Approved**, **Rejected**, **Revisions**) to filter the list.
- **Mark all read** clears the unread count. **Clear read** removes notifications you have already read.
- The trash icon on a notification deletes it.

2.5 Settings

Settings shows your account details (read-only), the subjects and sections you are assigned to, the **Appearance** choice (Light or Dark), and **Change Password**.

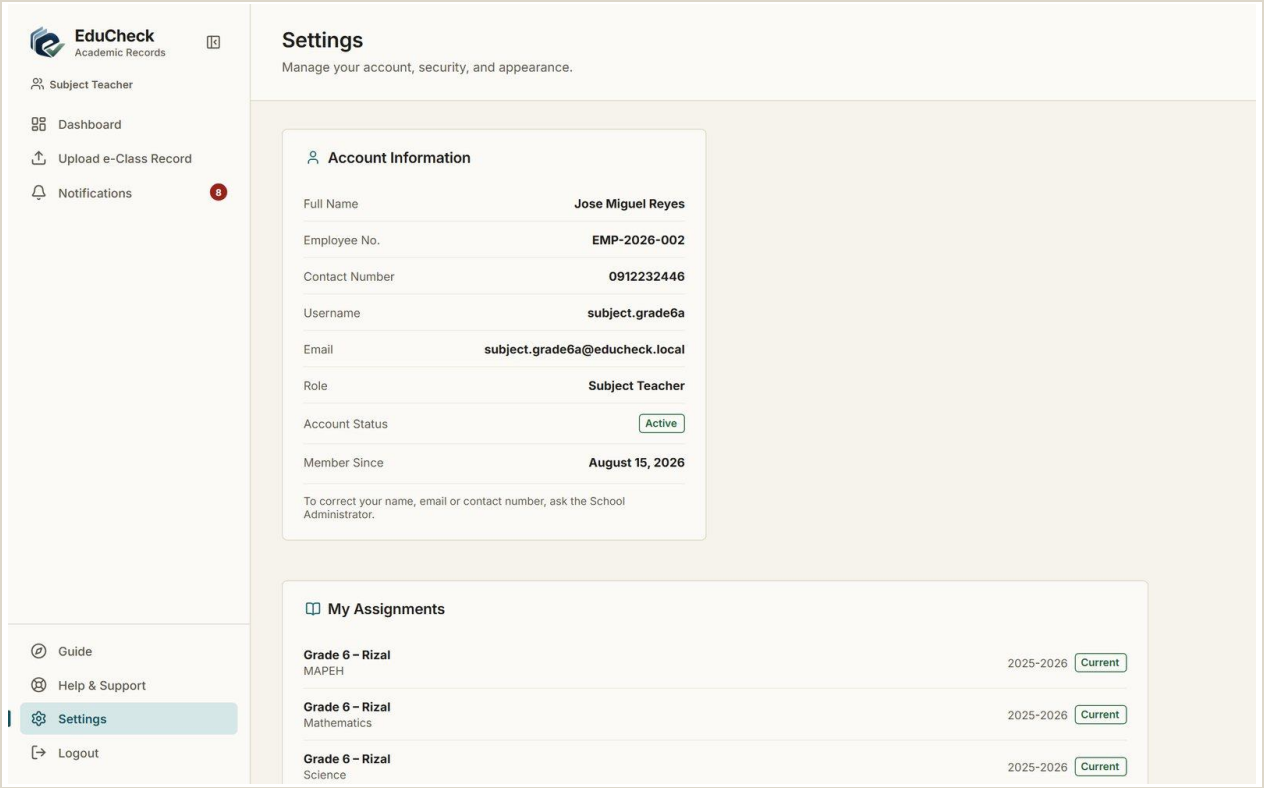

Figure 5. *Settings for a Subject Teacher*

To change your password, enter your current password, then the new one twice, and click **Update Password**. Your name, email and contact number are managed by the School Administrator; ask them to correct anything that is wrong.

2.6 Help & Support

Help & Support answers the questions your role asks most. Type a word such as password, upload or SF10 in the search box to find an answer quickly, and click a question to open it. The panel on the right tells you who to contact when you still need help.

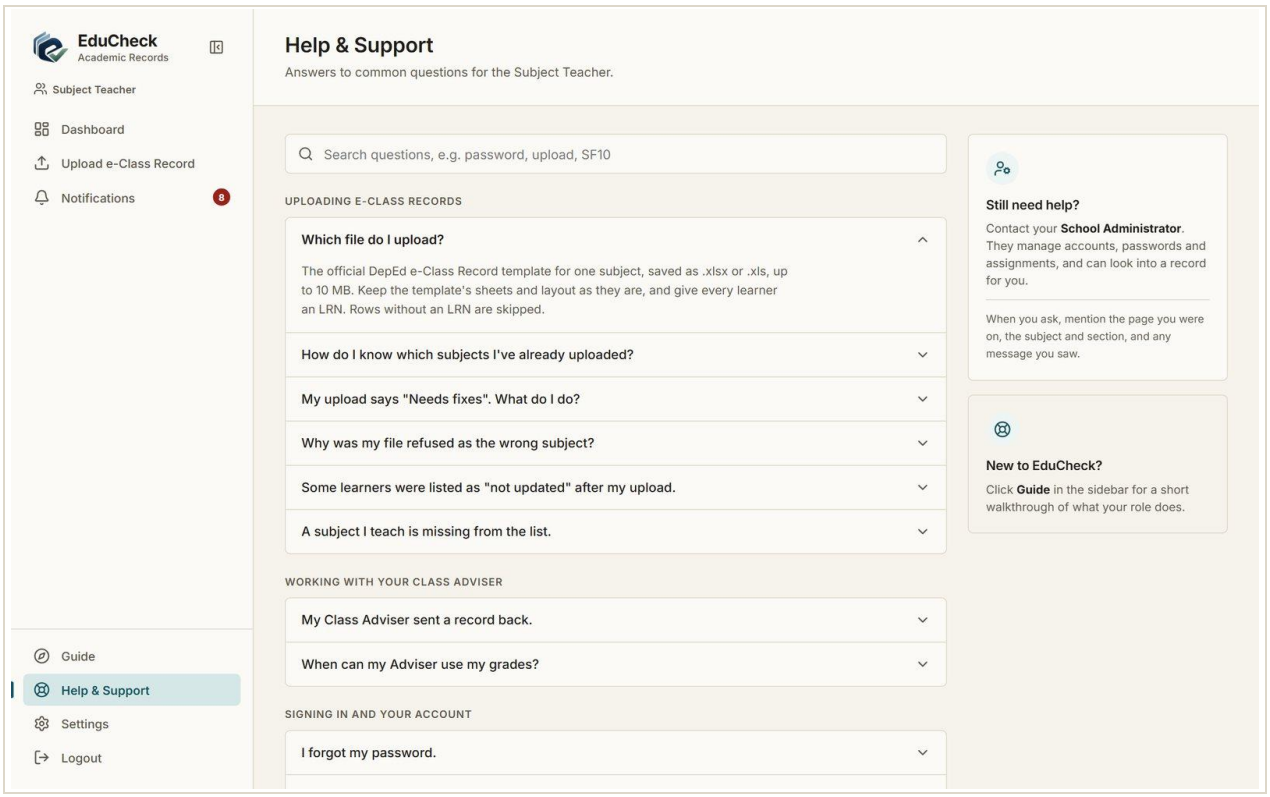

Figure 6. *Help & Support, with an answer opened*

2.7 Signing out

Click **Logout** at the bottom of the sidebar. Always sign out on a shared computer.

3. Subject Teacher

As a Subject Teacher you upload the e-Class Record of every subject and section you are assigned to, then fix anything EduCheck flags until each upload is validated.

3.1 Your dashboard

The dashboard shows **Next steps**: how many of your subjects are uploaded and how many passed validation, with a link to what is left. Below it are counts of your uploads, any records that need attention (including notes from your Class Adviser), and your recent uploads.

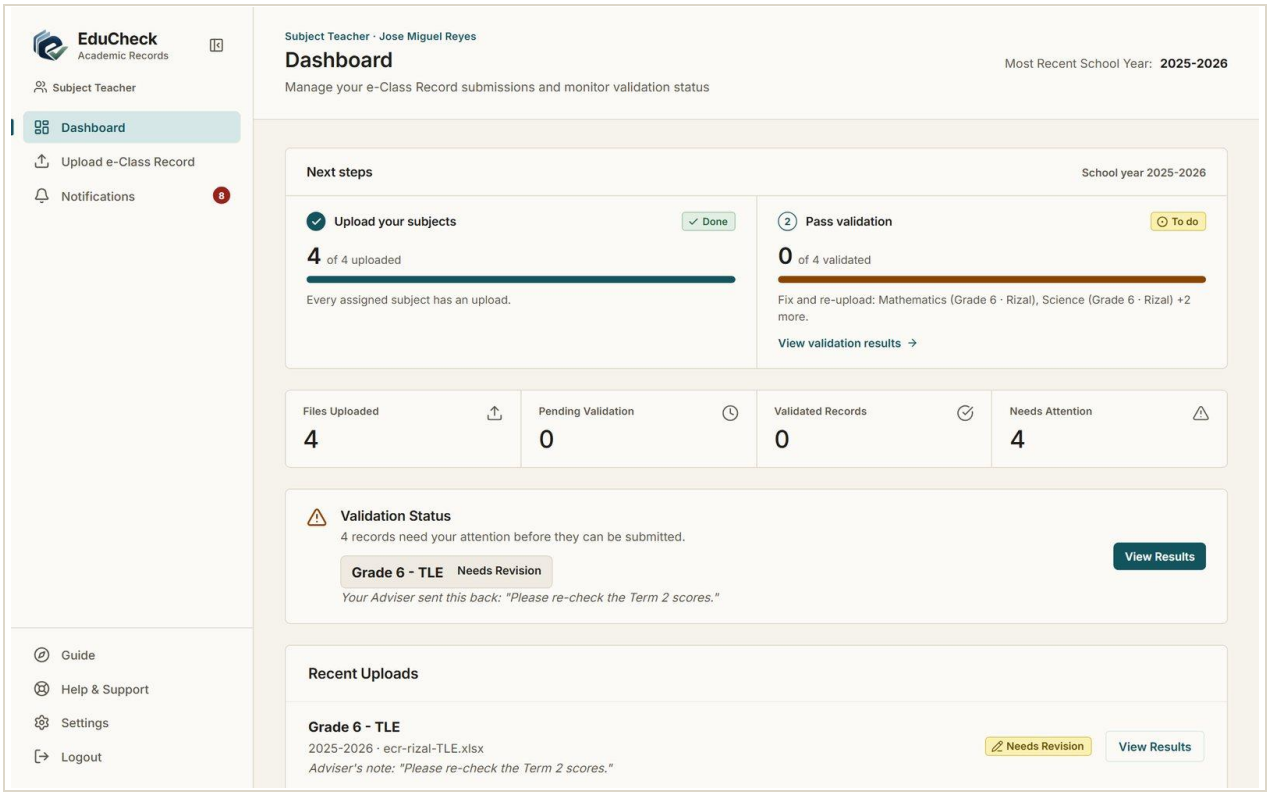

Figure 7. *Subject Teacher dashboard*

3.2 Uploading an e-Class Record

Open **Upload e-Class Record** in the sidebar.

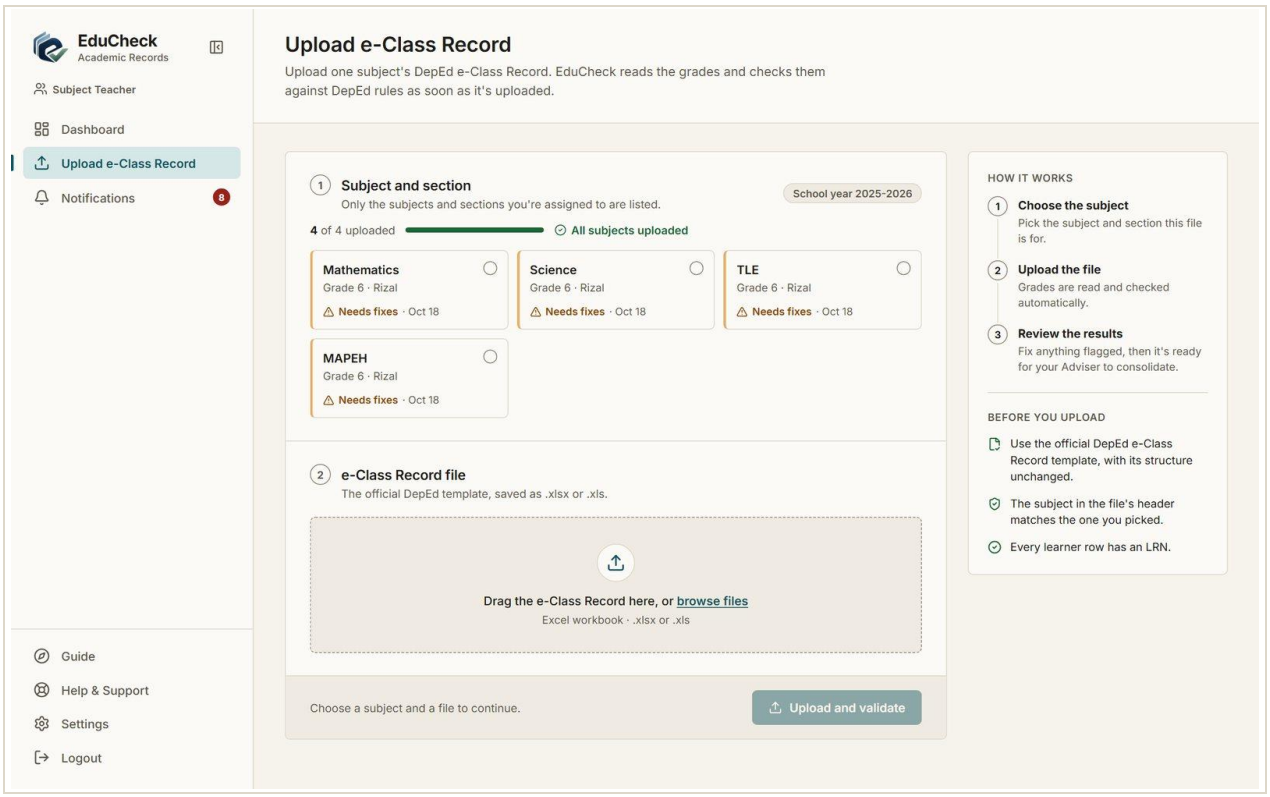

Figure 8. *The upload page: each subject shows its status*

1. Under **Subject and section**, check each tile's status: **Validated** (green), **Needs fixes** (amber) or **Not uploaded yet**, with the date of the last upload. The count above the tiles shows how many subjects are uploaded, and the next subject not yet uploaded is already selected.
2. Click the tile of the subject you are uploading.
3. Drag the Excel file into the box, or click **browse files** and choose it.
4. Click **Upload and validate**.
5. Read the result. **Uploaded and validated** means the grades are ready for your Class Adviser. **Uploaded — corrections needed** means there are problems to fix; click **View validation results**.
6. Click **Upload another file** for the next subject.

> **Note**
> Only the subjects and sections you are assigned to are listed. If one is missing, ask your School Administrator to add the assignment.

Before you upload, make sure that:

- the file is the official DepEd e-Class Record template with its structure unchanged;

- the subject written in the file's header (cell Y7 of the INPUT sheet) is the subject you selected — a file for a different subject is refused, while short names such as Math, AP, EsP, GMRC, TLE/EPP and MAPEH are accepted;
- every learner has an LRN, because rows without an LRN are skipped.

3.3 Reading the validation results

The validation results page lists every check EduCheck ran on the file: learners reviewed, missing data, invalid scores, duplicate entries and term or summary mismatches, followed by each issue found. A note from your Class Adviser appears at the top when they returned the record.

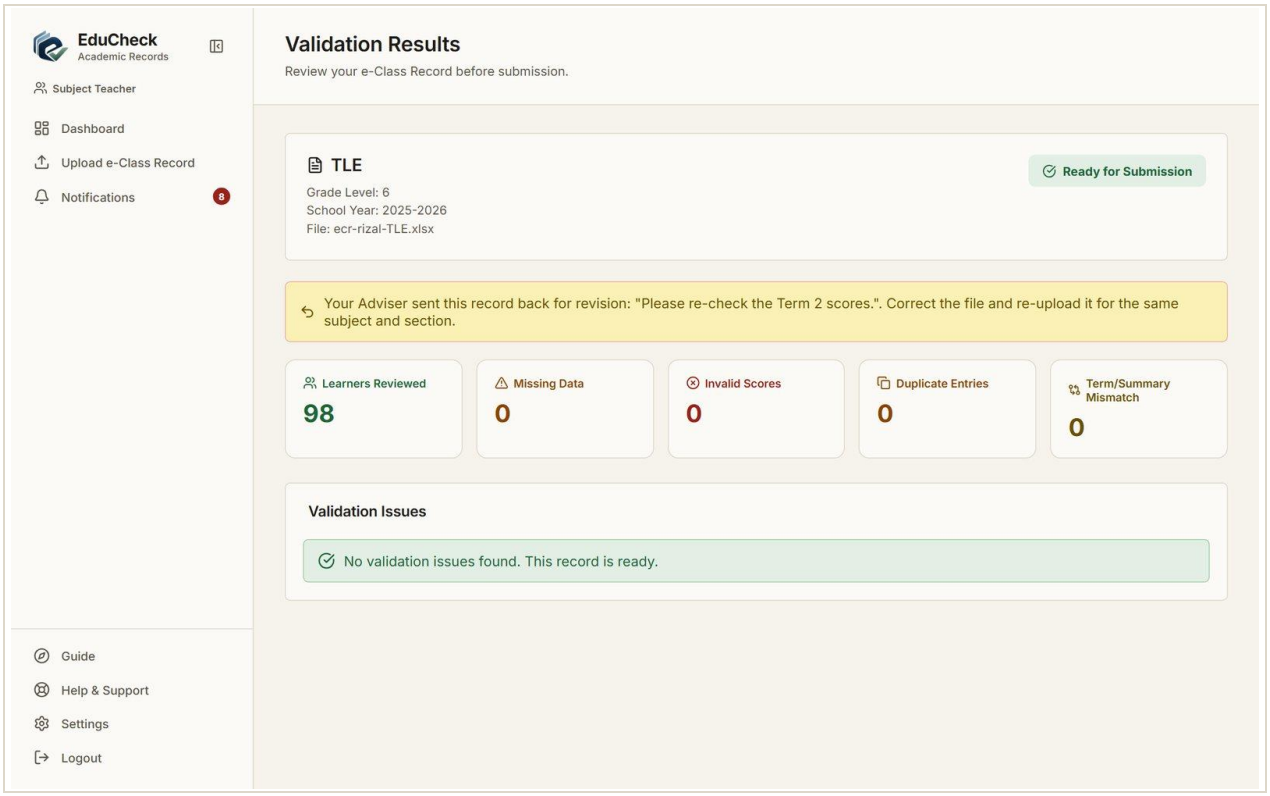

Figure 9. *Validation results of an upload*

3.4 Fixing and re-uploading

1. Open the validation results and note each issue.
2. Correct the cells in your Excel file. Grades are always corrected in the Excel file, not inside EduCheck.
3. Upload the corrected file again for the same subject and section.

> **Note**
> Learners whose records are already Pending Approval or Approved are locked. The rest of the class is saved, and the locked learners are listed as not updated. To change a locked learner, the Class Adviser must first request a revision.

3.5 When your Class Adviser returns a record

If the Class Adviser finds a problem, they send the subject back with a reason. You receive a notification, and the reason appears on your dashboard and on the validation results page. Fix the file and upload it again; the subject's status returns to Validated once it passes.

4. Class Adviser

As a Class Adviser you follow your section's uploads, review each learner's consolidated record, submit complete records for approval, and keep each learner's permanent record (SF10). You see only the learners of the section you advise.

4.1 Your dashboard

Next steps shows the three stages of your work: subjects uploaded and validated, learner records complete, and records approved, each with what is still missing and a link to it. Below are your section's counts and a performance summary that highlights learners who may need intervention.

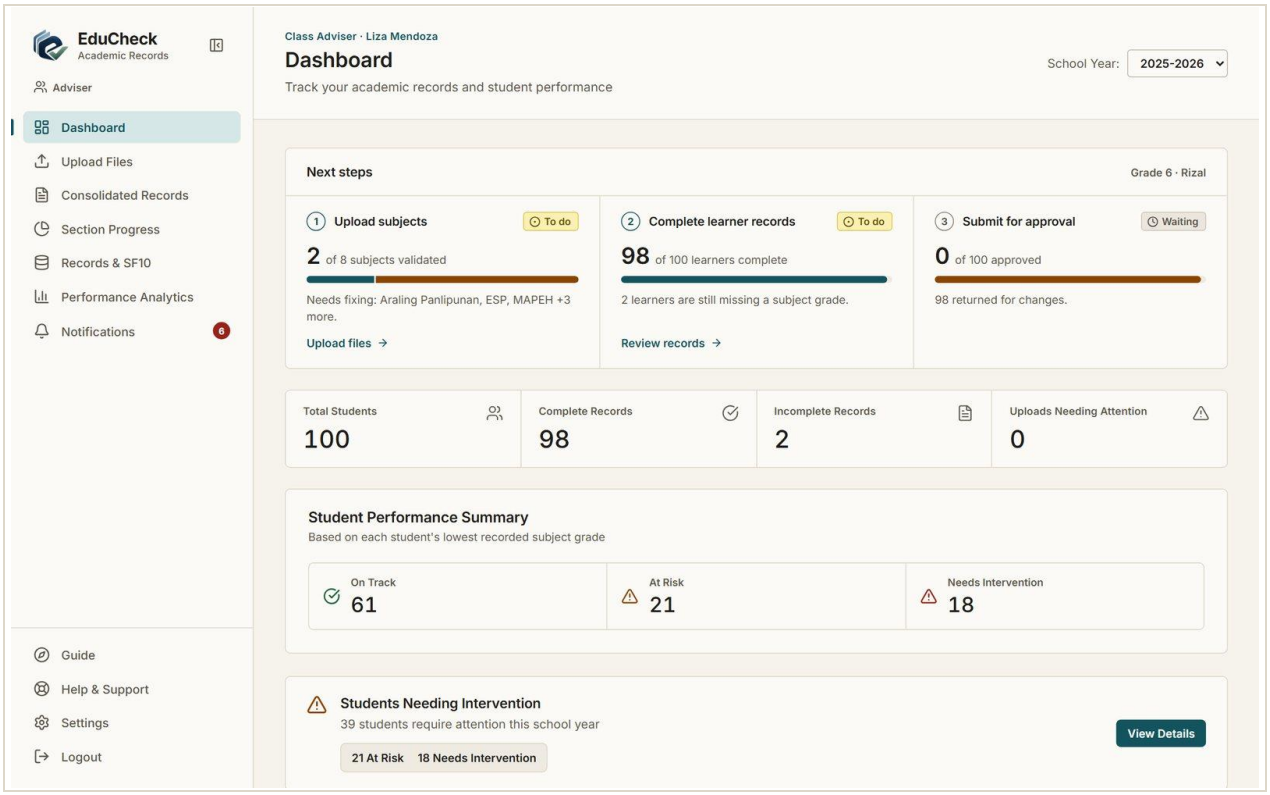

Figure 10. *Class Adviser dashboard*

4.2 Following your section's progress

Section Progress shows, for your section, how many learning areas are submitted, which need revision, and where learners stand in the approval workflow. Click **View Students** to open the section's learners.

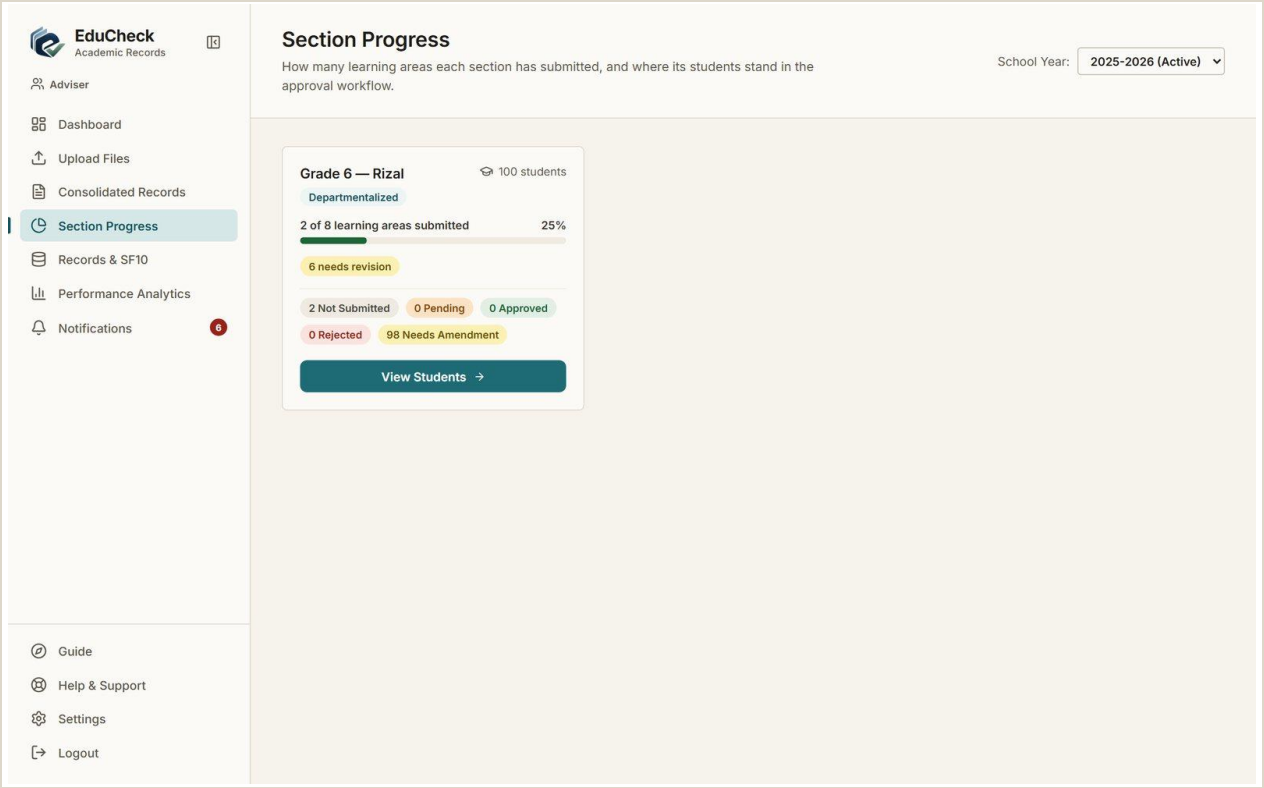

Figure 11. *Section Progress*

4.3 Reviewing consolidated records

Consolidated Records lists each learner with how many subjects have grades (for example 8 / 8) and the record's status. Use the search box to find a learner by name or LRN, and the tabs (**All**, **Ready**, **Incomplete**, **Pending approval**, **Returned**, **Approved**) to narrow the list.

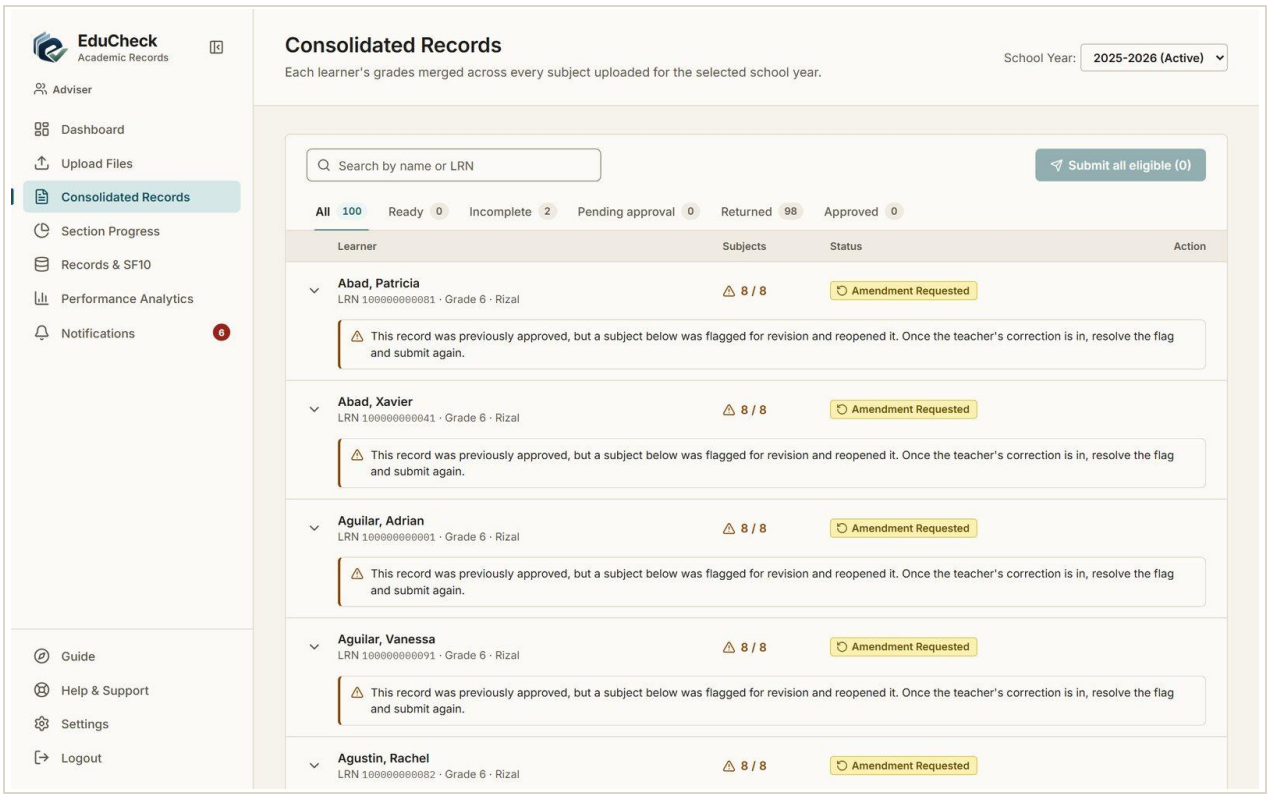

Figure 12. *Consolidated Records for the Adviser's section*

Click a learner to open their grades: one row per subject with the teacher, the term grades, the final grade and the subject's status.

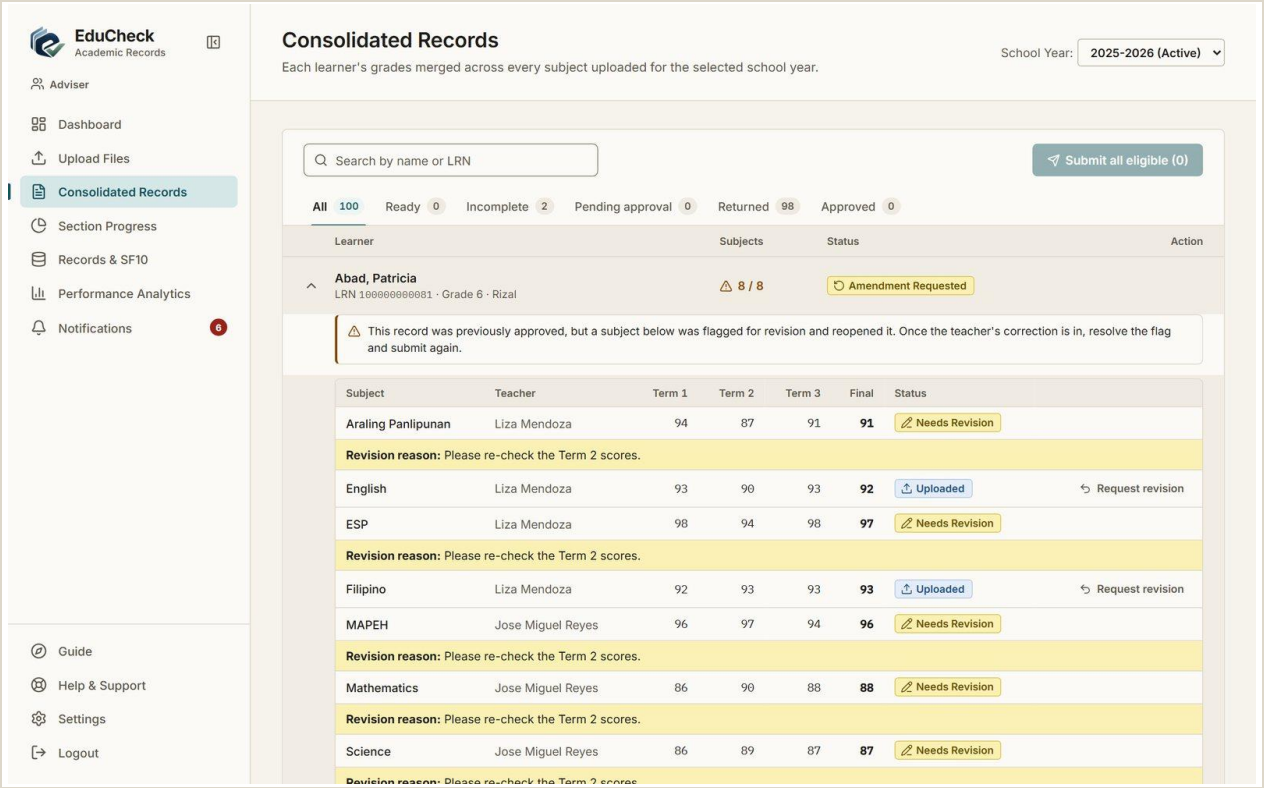

Figure 13. *A learner's consolidated grades, with revision reasons*

Sending a subject back to its teacher

1. Open the learner and find the subject.
2. Click **Request revision** on that subject.
3. Type the reason, for example which scores to re-check. A reason is required.
4. Click **Confirm Request**. The subject teacher is notified, and the subject shows Needs Revision until a corrected file is uploaded.

4.4 Submitting records for approval

A learner's record can be submitted when every subject is Validated, every term has a final grade, and no subject is waiting for a revision. EduCheck shows what is still missing for a record that cannot be submitted yet.

1. Click **Submit** on a learner whose record is ready, or click **Submit all eligible** to submit every ready record at once.
2. The record becomes **Pending approval** and the School Administrator is notified.
3. If the Administrator returns a record, it shows **Returned** with the reason. Fix the problem, then submit it again.

> **Note**
> A submitted or approved record is locked. To change it, request a revision on the subject that needs correcting; the record reopens as Amendment Requested, and you submit it again after the correction.

4.5 Uploading your own subjects

If your section is Self-Contained, or you are assigned subjects of your own, **Upload Files** appears in your sidebar. It works exactly like the Subject Teacher upload in section 3.2.

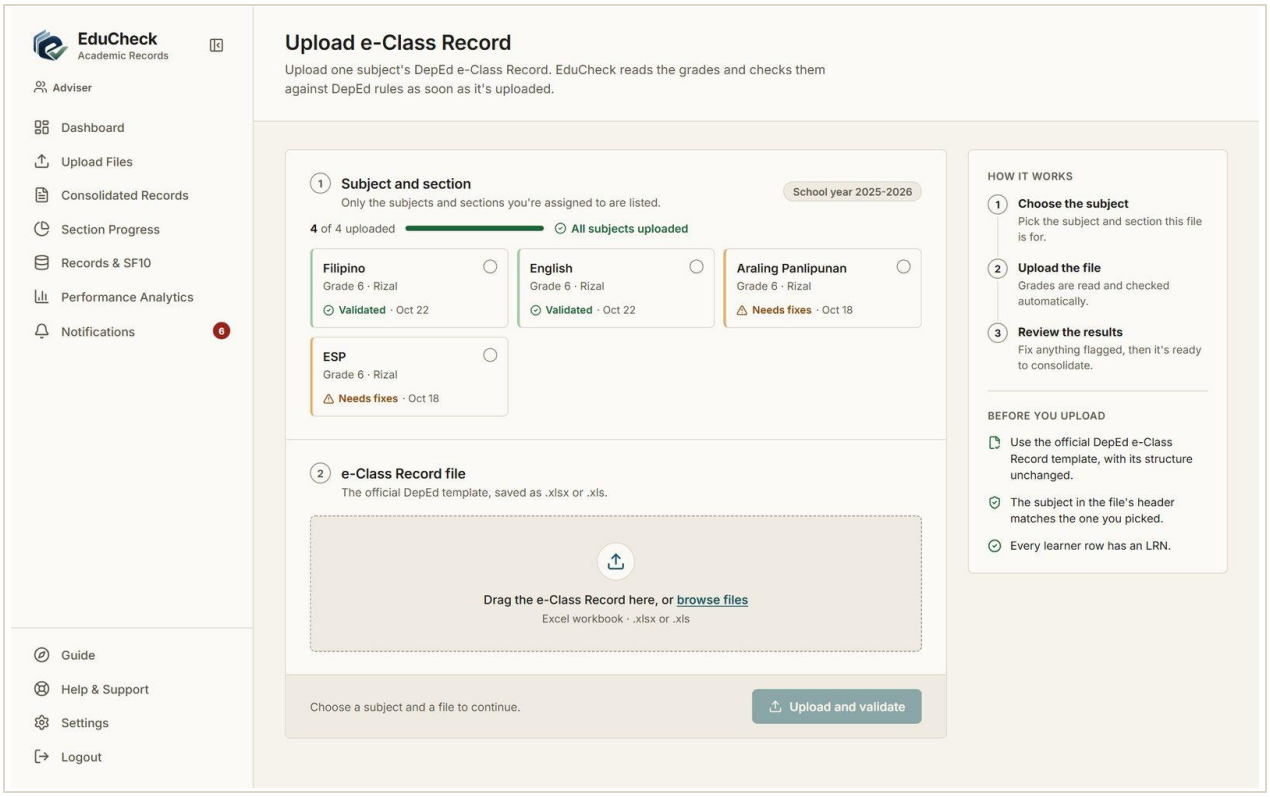

Figure 14. *Upload Files for an Adviser who teaches four subjects*

4.6 Records and SF10

Records & SF10 finds learners by LRN or name, grade level or school year. For each learner, **Permanent Record (SF10)** opens the SF10 page, and the school-year button opens that year's consolidated grades.

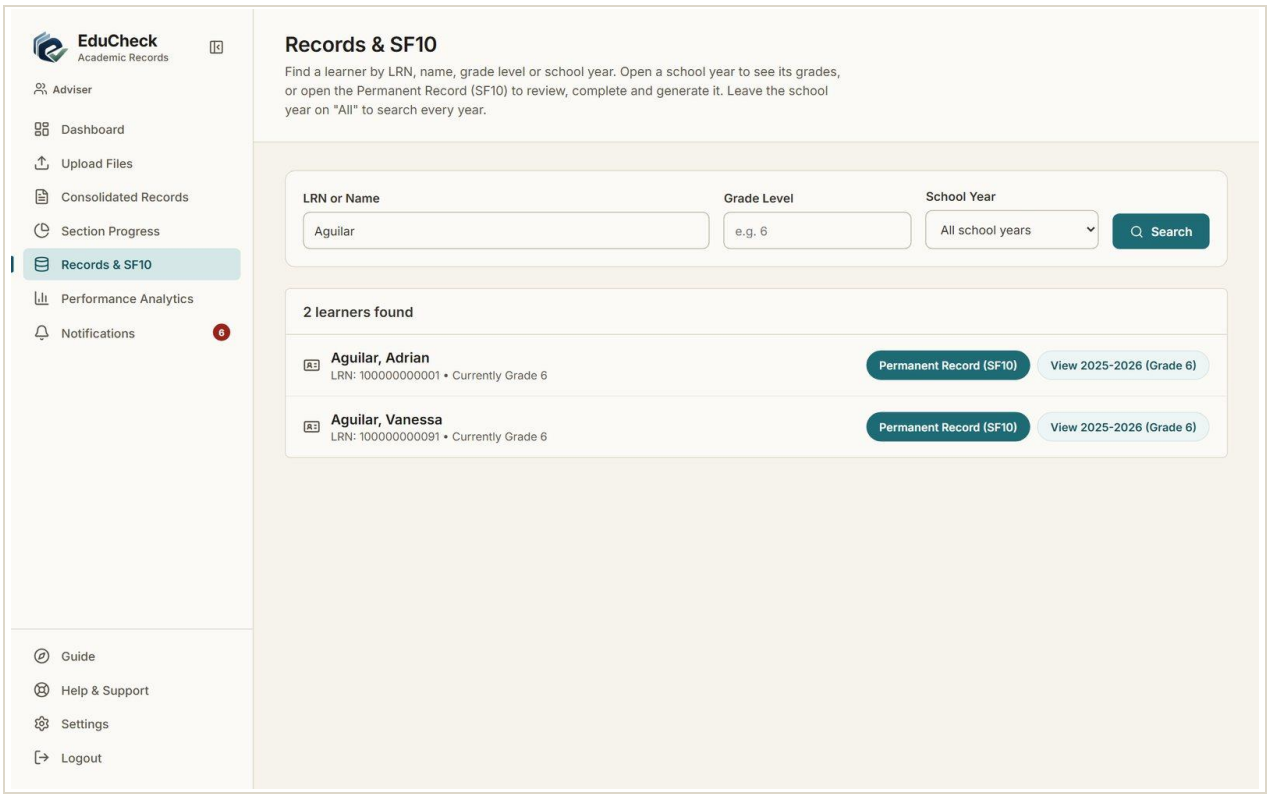

Figure 15. *Searching Records & SF10*

The SF10 page shows how ready the form is (**Readiness**), the scholastic record for Grades 1 to 6, the learner's details and the school details.

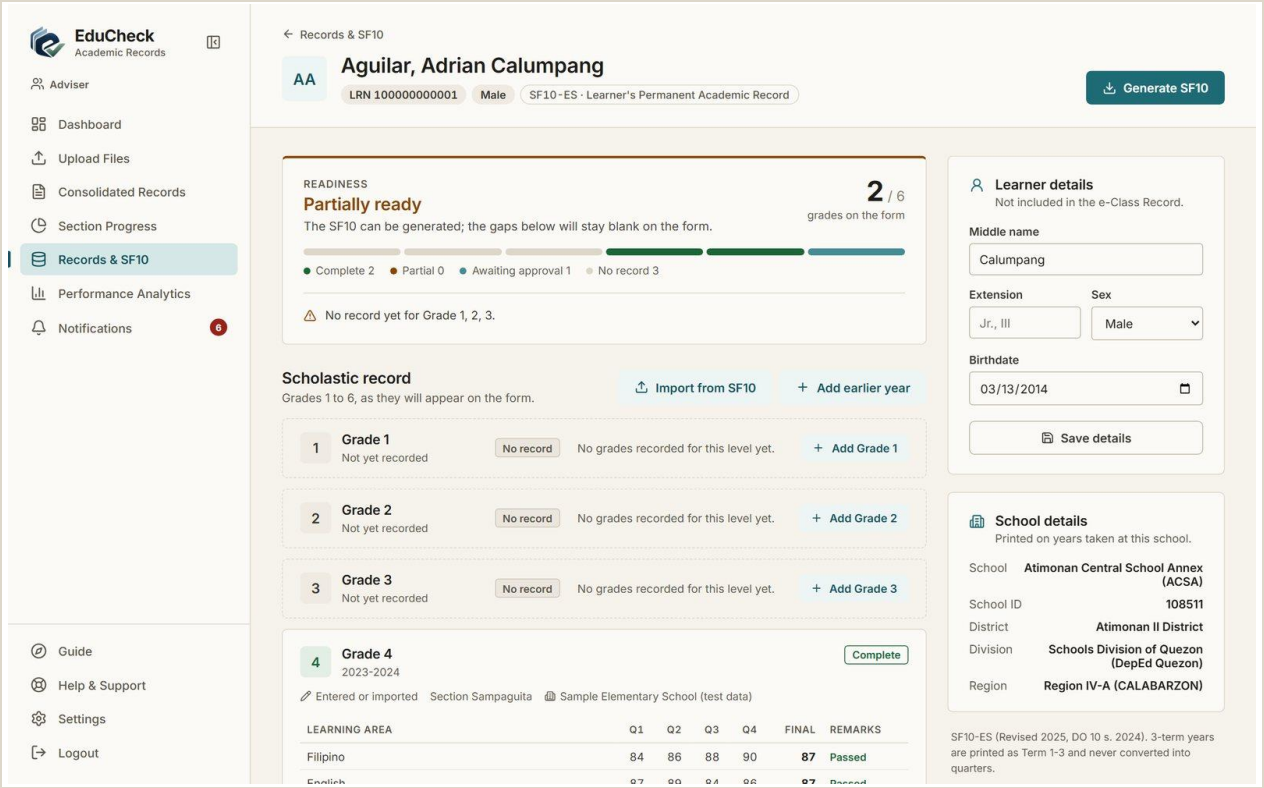

Figure 16. *A learner's permanent record (SF10)*

- **Generate SF10** downloads the official SF10-ES form with every year that has grades.
- **Add earlier year** (or **Add Grade** on a level) types in a year taken before EduCheck, such as at another school.
- **Import from SF10** reads earlier years from the learner's existing SF10-ES Excel file. It shows a preview and saves only the years you tick. A file with another learner's LRN is refused.
- **Learner details** (middle name, extension, sex, birthdate) are not in the e-Class Record; complete them here and click **Save details**.

> **Note**
> A school year appears on the SF10 once its record is Approved. A year graded in three terms is printed in three of the form's four rating columns, labelled T1 to T3; EduCheck never converts terms into quarters.

4.7 Performance analytics

Performance Analytics shows your section's graded entries, average final grade, pass rate and at-risk entries, with an **Intervention Flag List** of learners whose grades fall below the passing mark of 75.

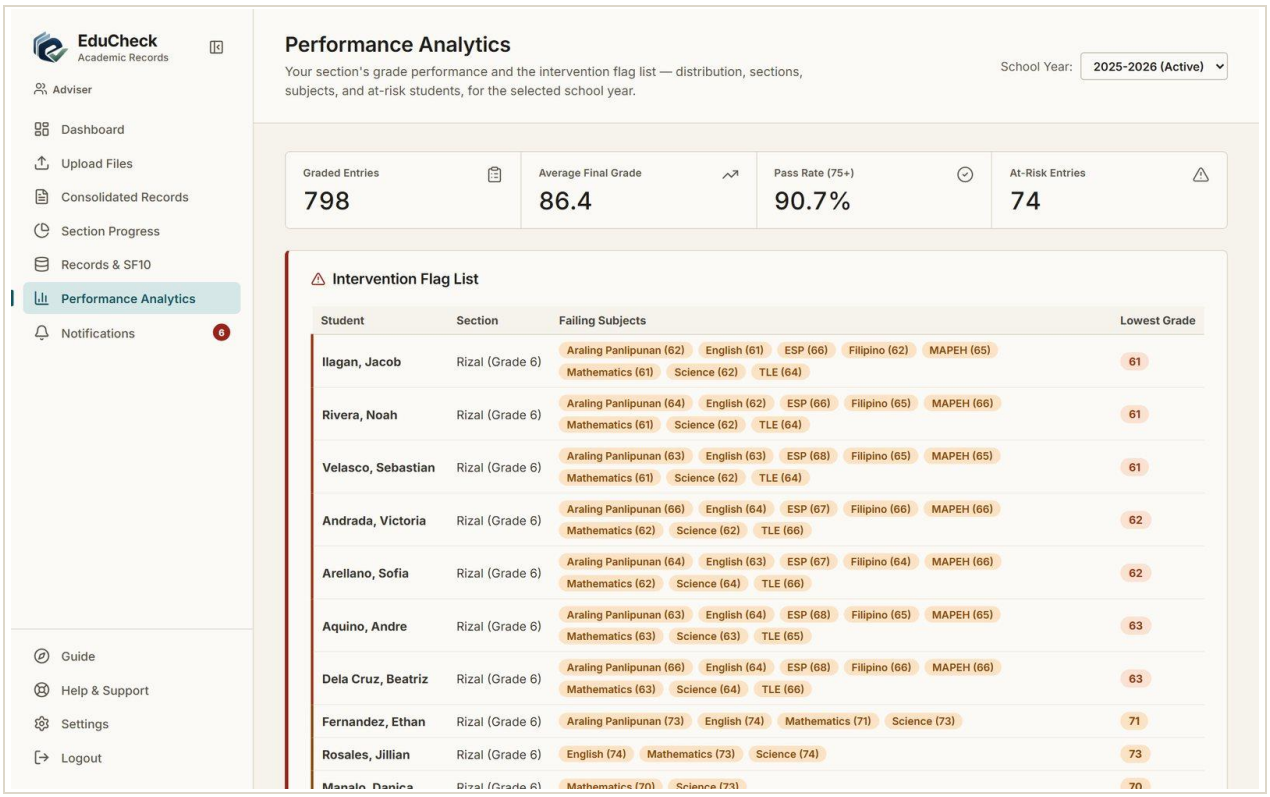

Figure 17. *Performance Analytics with the intervention flag list*

5. School Administrator

As the School Administrator you set EduCheck up for the school year, manage accounts, approve the records Class Advisers submit, and keep an eye on activity.

5.1 Your dashboard

The dashboard shows totals for users and submissions, the most recent submissions, and quick links to the pages you use most.

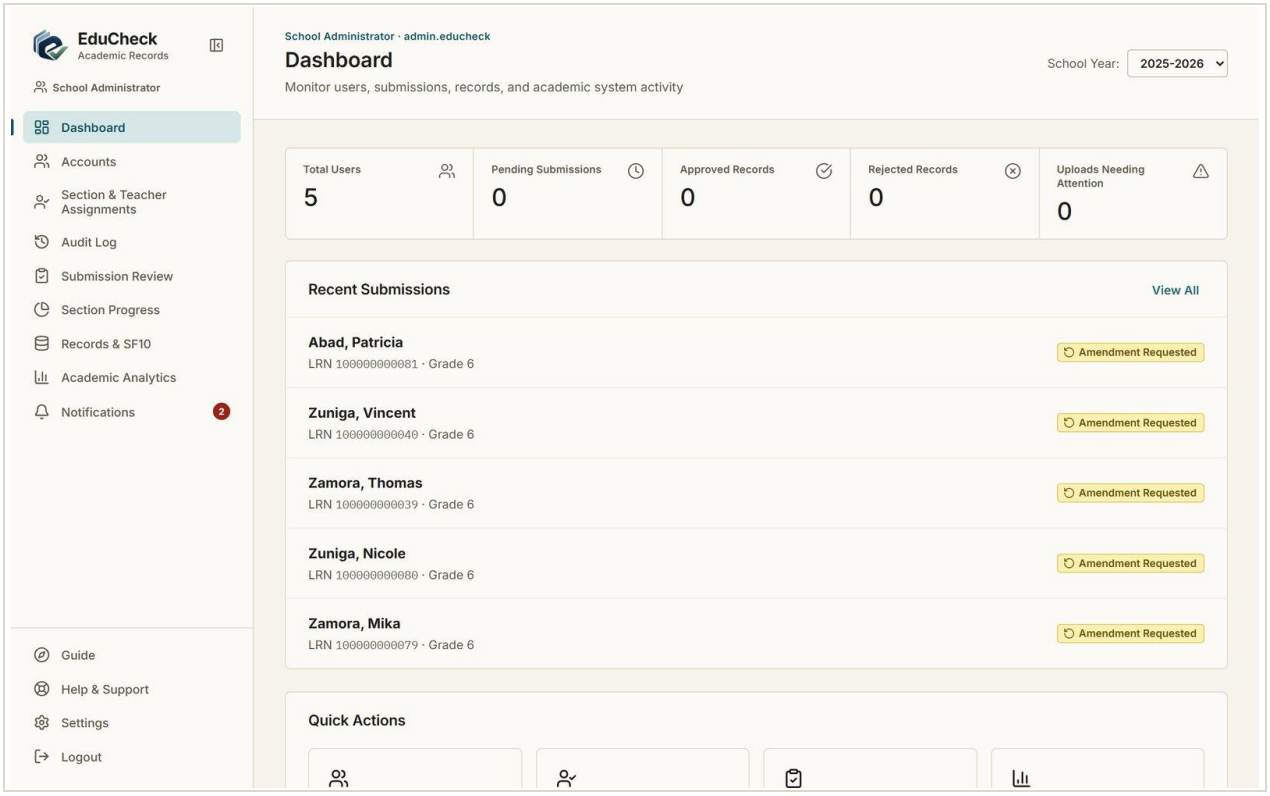

Figure 18. *School Administrator dashboard*

5.2 School years

Open **Settings** and find **School Years**. Open a new school year before assigning teachers to it; a learner keeps the same LRN every year, so they can be uploaded under a new grade and section in the new school year.

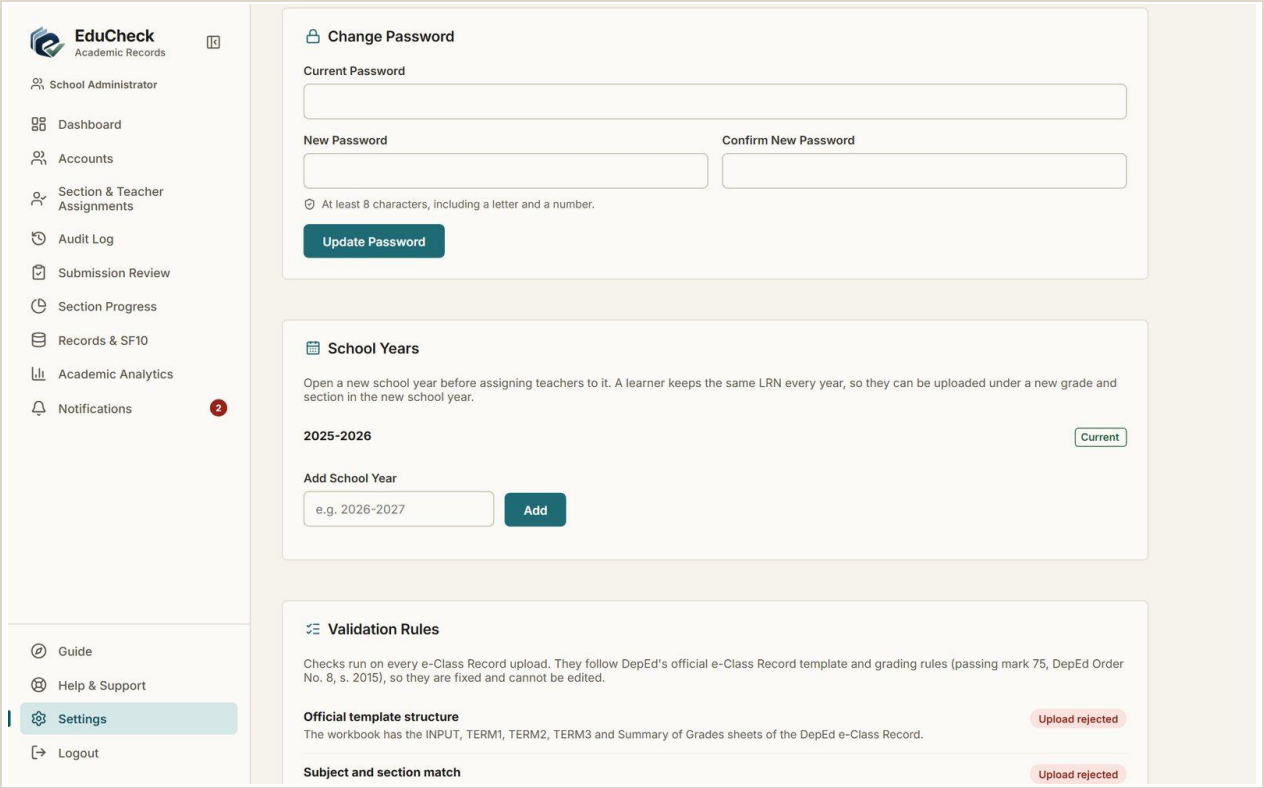

Figure 19. *School Years and Validation Rules in Settings*

1. Type the school year as two consecutive years, for example 2026-2027, under **Add School Year**, and click **Add**. It is added as Inactive.
2. When the new year starts, click **Set as current** beside it. Pages open on the current year; records of other years stay available.

Validation Rules in Settings lists every check run on an upload and what happens when it fails. The rules follow DepEd grading policy, so they cannot be edited.

5.3 Accounts

Accounts lists everyone who can sign in, with their role, employee number, email and status. Use the search box to find an account.

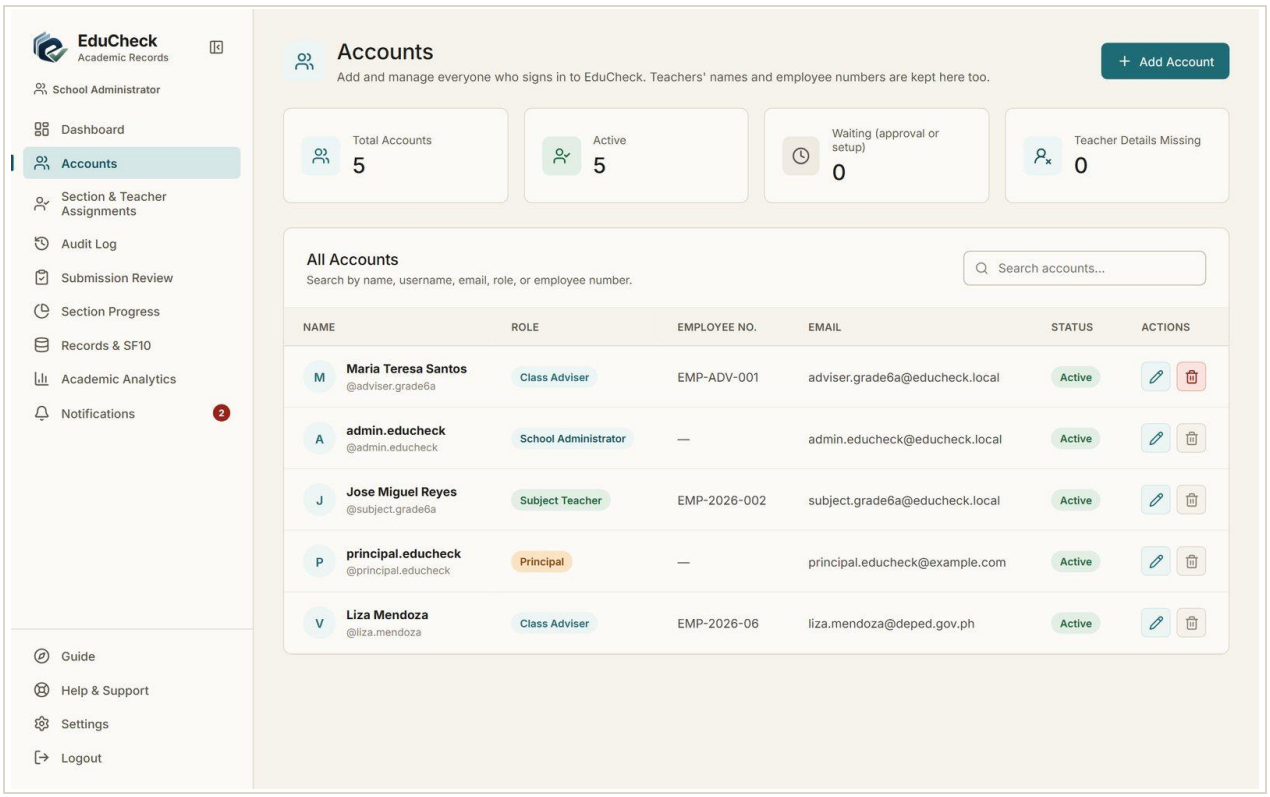

Figure 20. *Accounts*

Creating an account

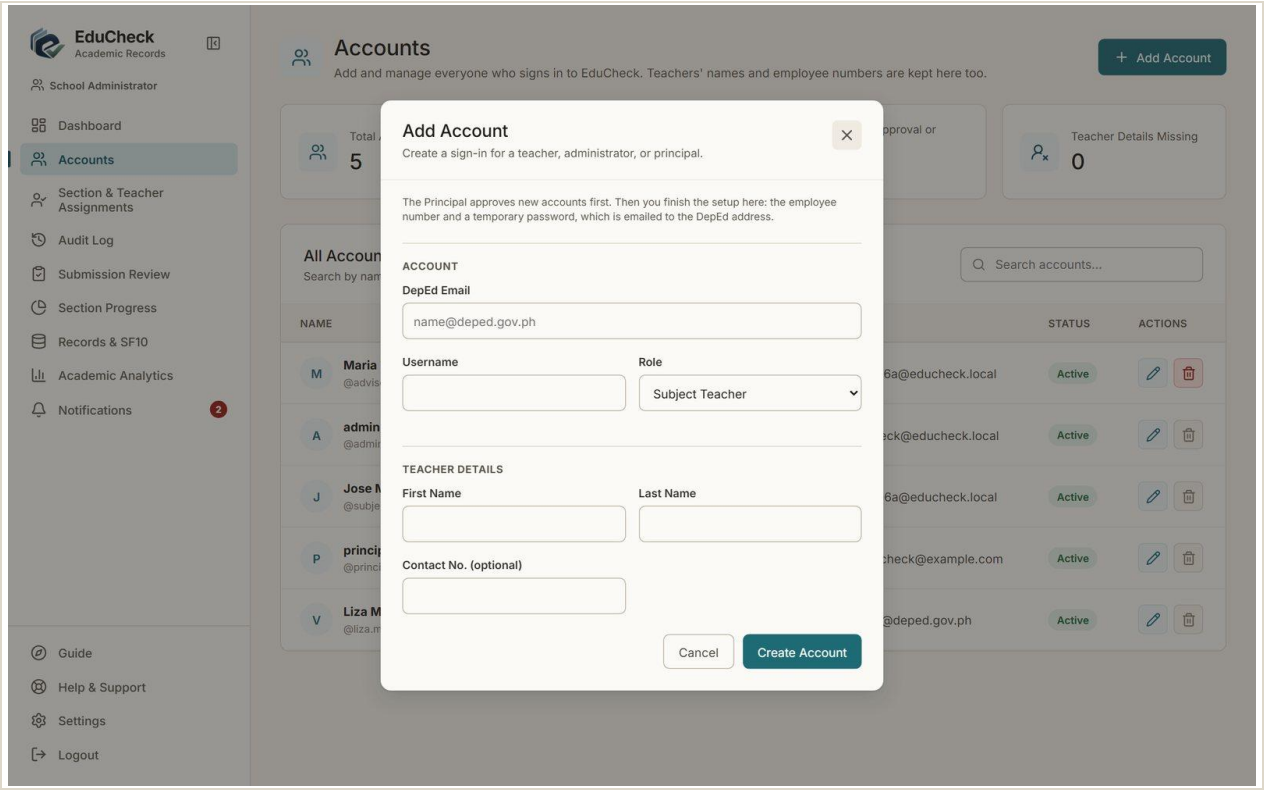

Figure 21. *Add Account*

1. Click **Add Account**.
2. Enter the person's **DepEd Email** (ending in @deped.gov.ph), a **Username** and the **Role**. For a Subject Teacher or Class Adviser, also enter the first and last name under **Teacher Details**.
3. Click **Create Account**. The account waits for the Principal's approval.
4. After the Principal approves it, click **Finish setup** on the account. Enter the employee number and a temporary password (or click **Generate**). The username and temporary password are emailed to the person's DepEd address; if the email cannot be sent, the password is shown so you can hand it over.
5. The person signs in and replaces the temporary password.

> **Note**
> When there is no active Principal account (first setup), new accounts skip approval. A role change that gives more access also waits for the Principal; removing access applies at once.

Editing, resetting a password and deactivating

- Click the pencil icon to edit an account's details, role or status.
- To reset a forgotten password, edit the account and use **Reset Password**. The user must replace it at their next sign-in.
- To stop someone from signing in, set the status to **Inactive**.
- An account can be deleted only if it has no records in EduCheck. Otherwise the delete button is greyed out and explains why; set the account to Inactive instead.

5.4 Sections and teacher assignments

Section & Teacher Assignments sets up each section and who teaches it.

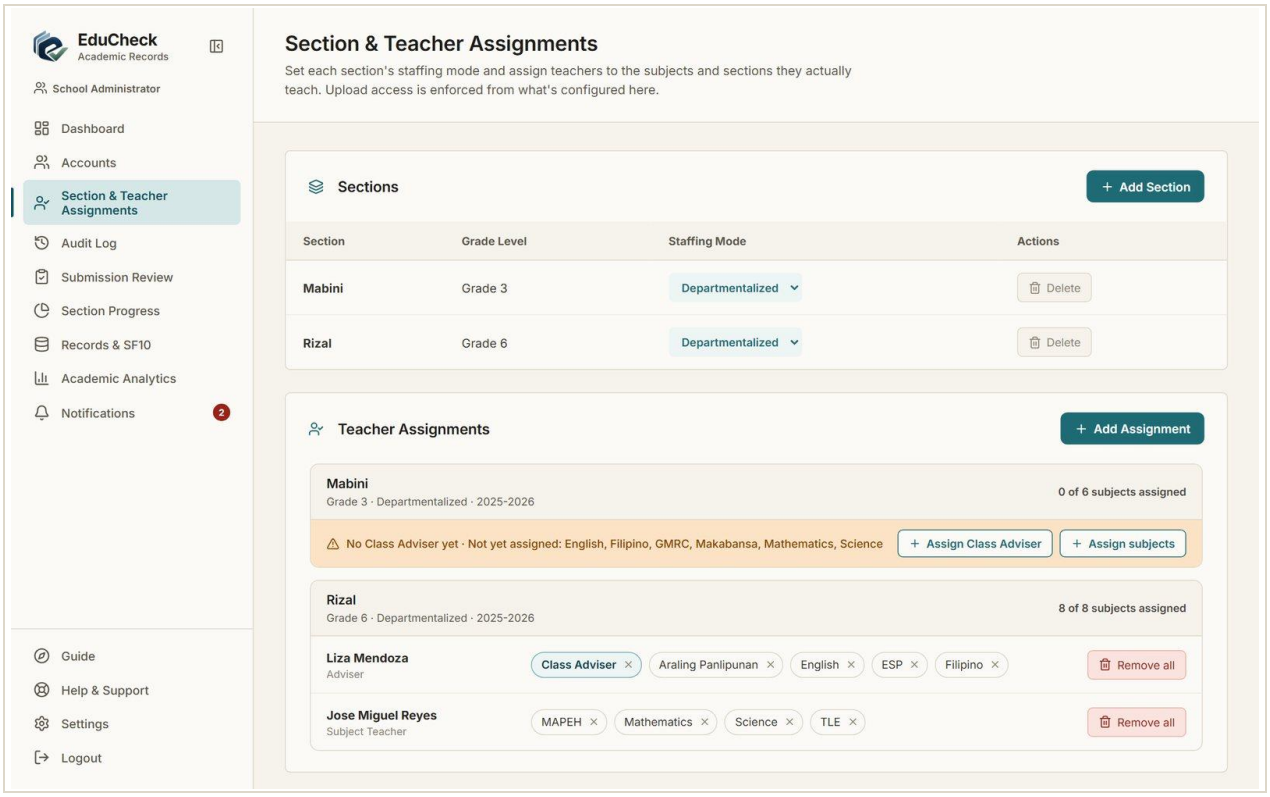

Figure 22. *Sections and teacher assignments*

1. Click **Add Section** and enter the section name, grade level and **Staffing Mode**: **Departmentalized** (subjects are taught by different teachers) or **Self-Contained** (the Class Adviser teaches every subject). The staffing mode can be changed later from the section list.
2. Under **Teacher Assignments**, use **Assign Class Adviser** and **Assign subjects** (or **Add Assignment**) to assign teachers for the school year. Each section shows how many of its subjects are assigned and which are still missing.
3. Remove one assignment with the x on its chip, or all of a teacher's assignments in a section with **Remove all**.

> **Note**
> A section that already has class records or learners cannot be deleted; its delete button is greyed out and explains why.

5.5 Reviewing and approving submitted records

Submission Review lists every learner of the school year. Use the **Section** selector beside the School Year to show one section, the search box to find a learner, and the tabs to show, for example, only **Pending approval** records.

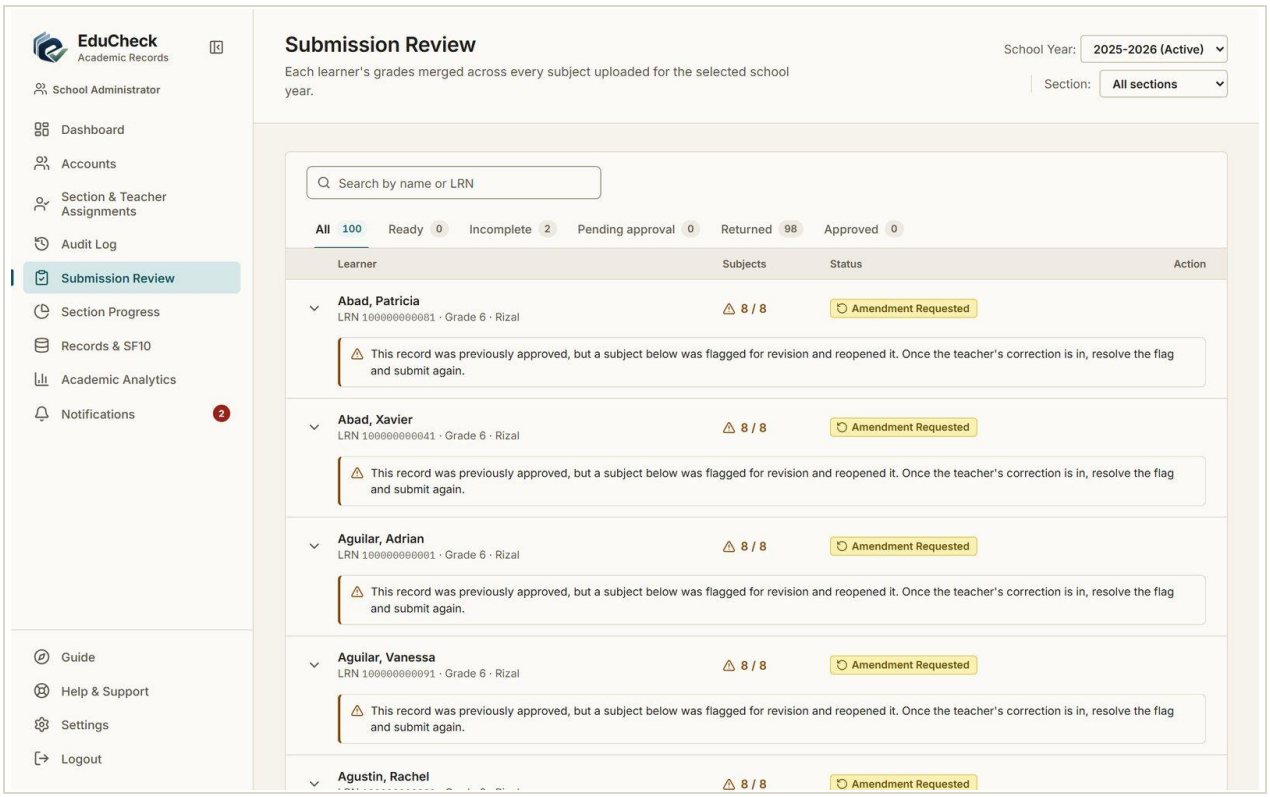

Figure 23. *Submission Review*

1. Open a learner to check their grades.
2. Click **Approve** to approve the record, or **Reject** to return it to the Class Adviser. A reason is required when rejecting; click **Confirm Reject**.
3. To approve several records at once, tick them (or **Select all pending**) and click **Approve selected**.

Section Progress shows every section side by side, so you can see which sections are complete.

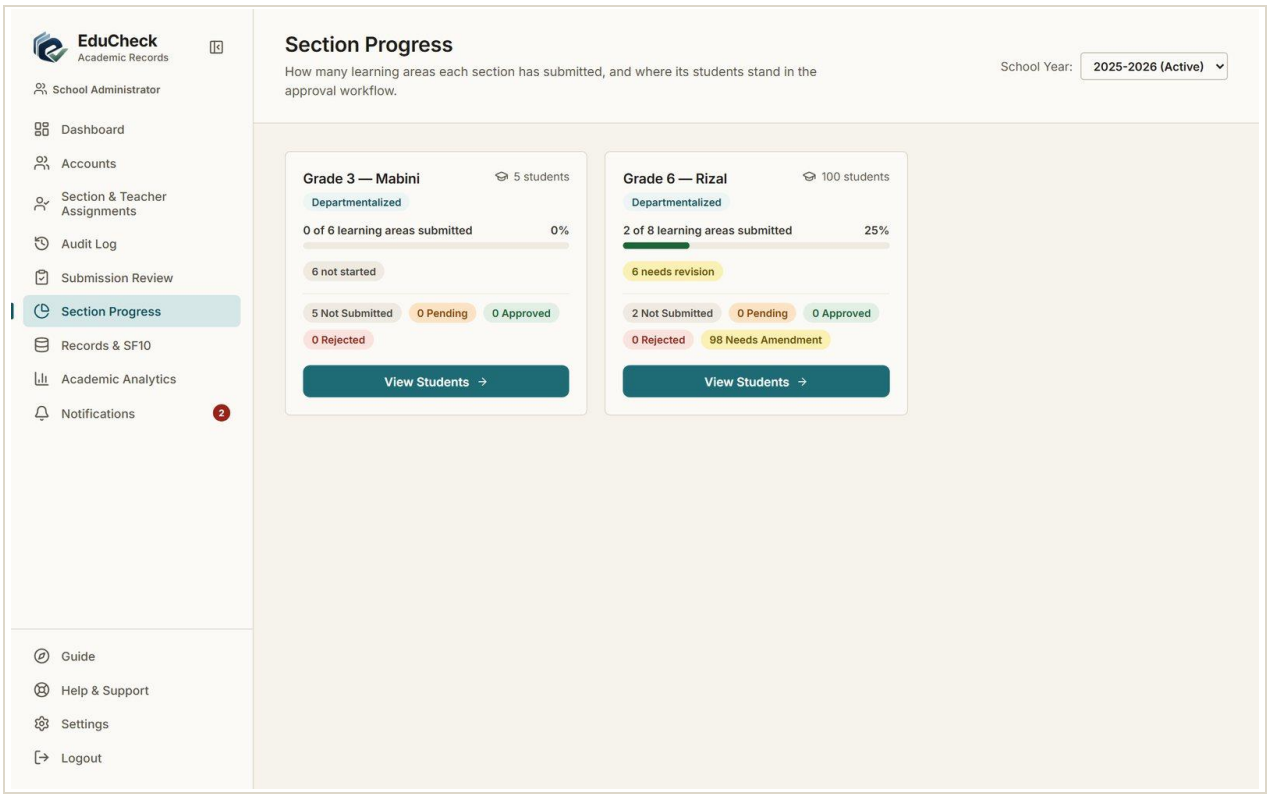

Figure 24. *Section Progress for all sections*

5.6 SF10 school details

On any learner's SF10 page (see section 4.6), the **School details** panel holds the school name, school ID, district, division and region printed on the form. Set them once and click **Save school details**.

5.7 Academic analytics

Academic Analytics shows school-wide grade performance, the sections and subjects, and the learners flagged for intervention for the selected school year.

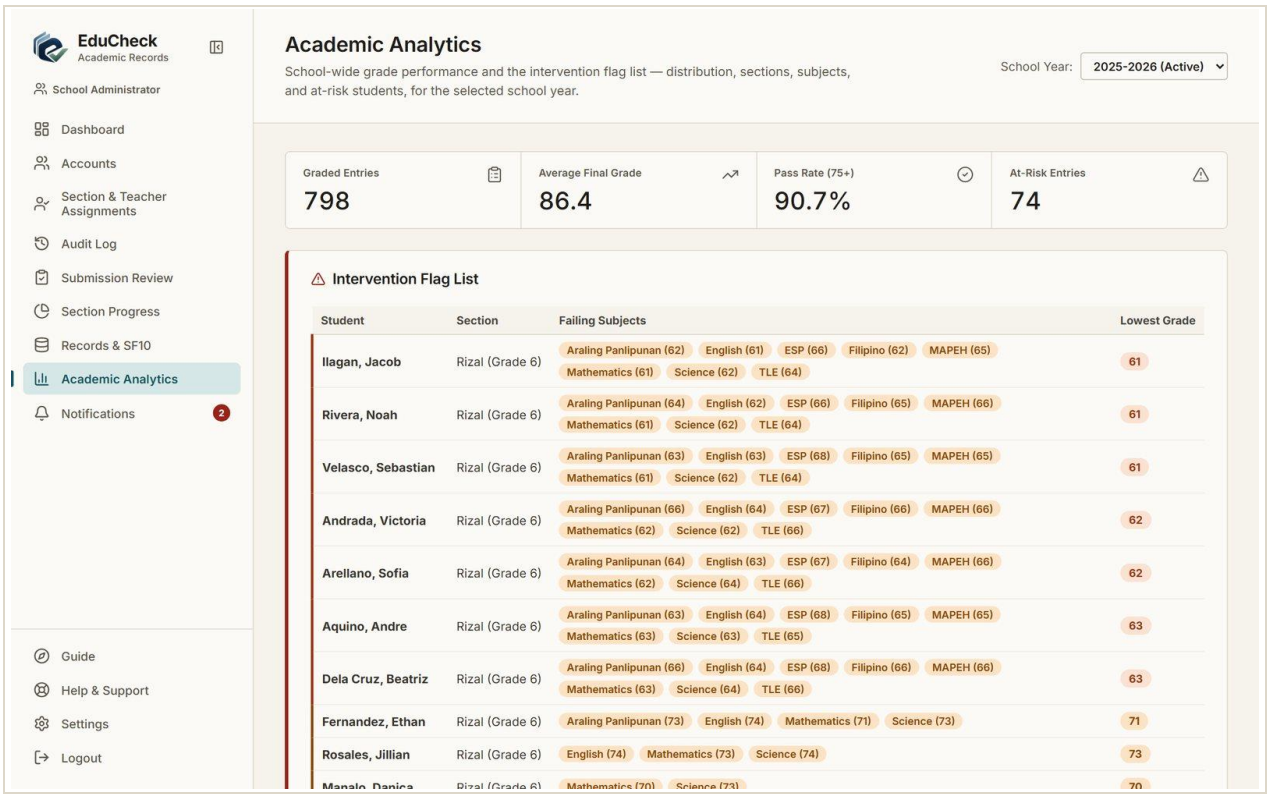

Figure 25. *Academic Analytics*

5.8 Audit log

Audit Log records every change to accounts, sections, teacher assignments and school years: who made it, when, and what changed. Entries are grouped by day; open one to see the details, and use **Entity** to filter by type.

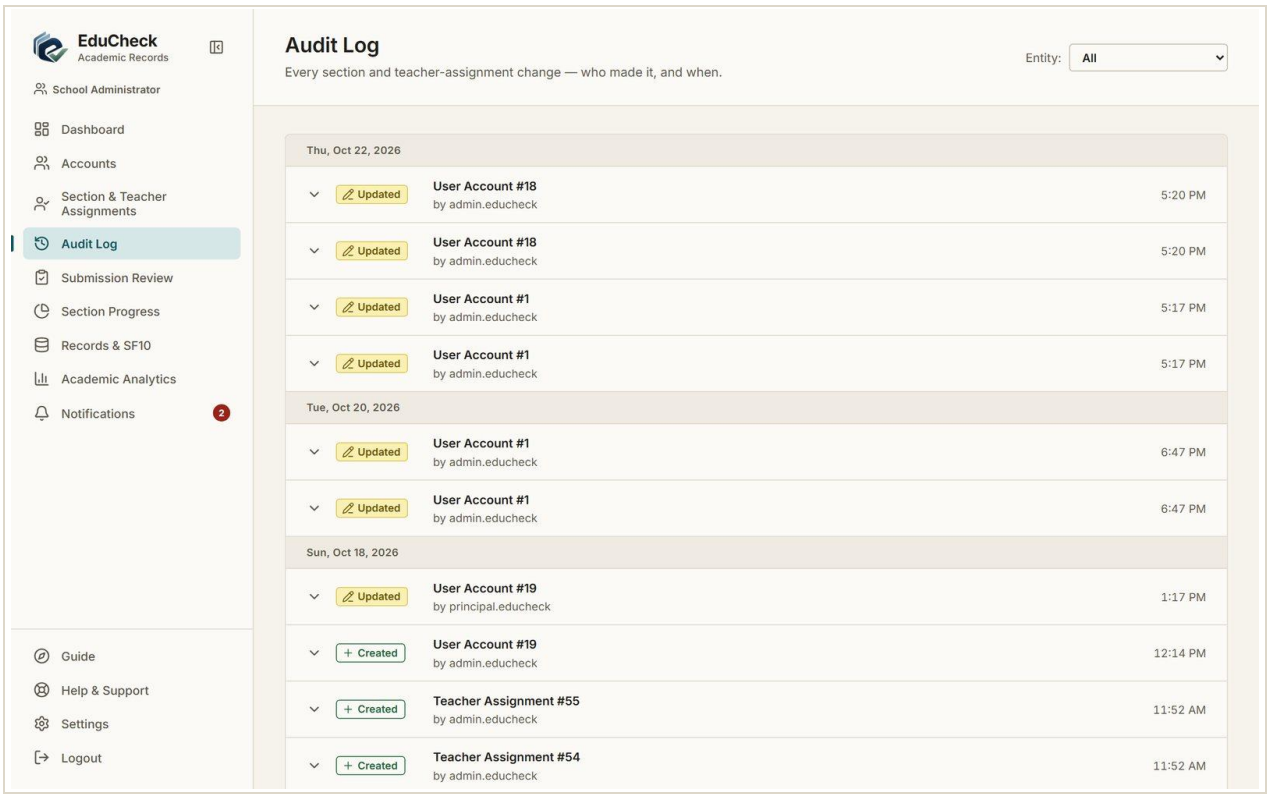

Figure 26. *Audit Log*

6. Principal

As the Principal you oversee the school's academic records. You can view every record, progress page and analytics page, and your one action is approving accounts. You cannot upload, edit or approve records.

6.1 Your dashboard

The dashboard shows how many sections are fully submitted and the counts of pending, approved and rejected records, with links to Section Progress, Submission Review and Records & SF10.

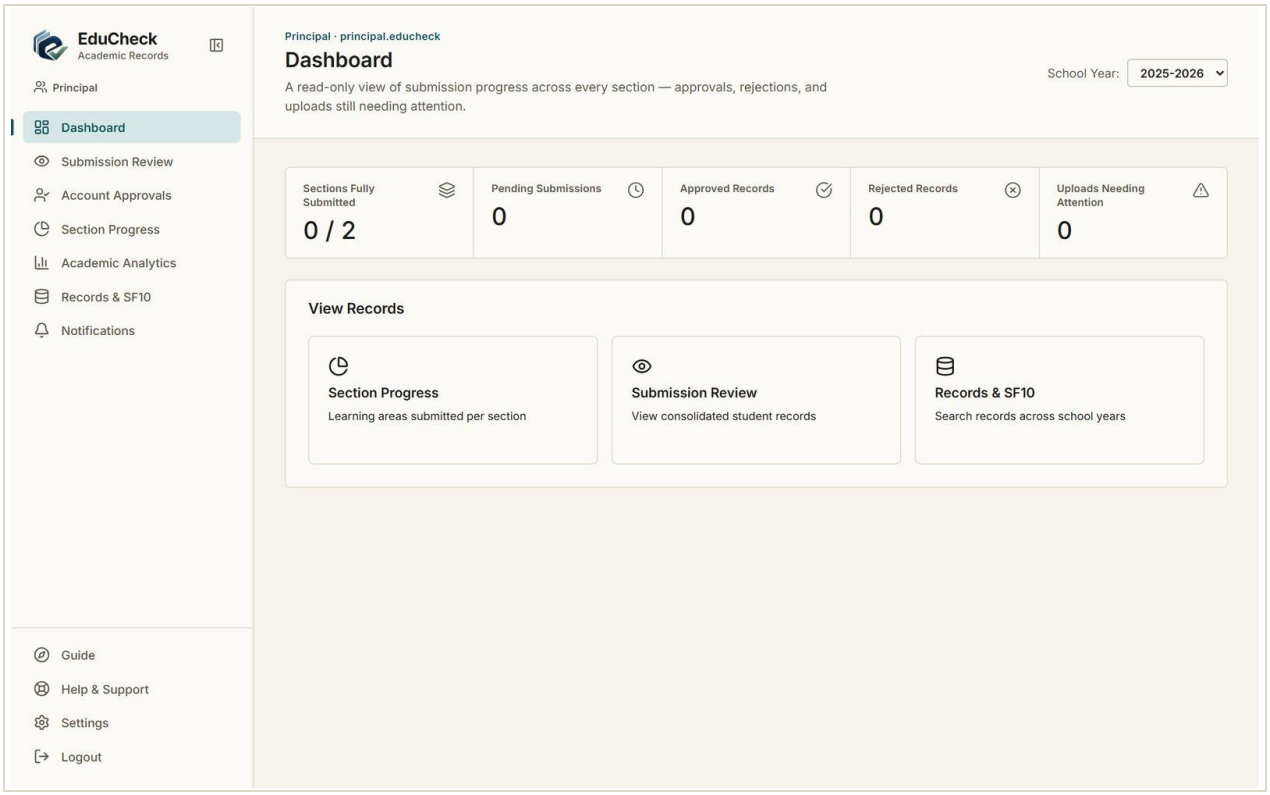

Figure 27. *Principal dashboard*

6.2 Approving accounts

Account Approvals lists the new accounts the School Administrator created and the role changes that give more access. Nothing listed here can be used until you approve it.

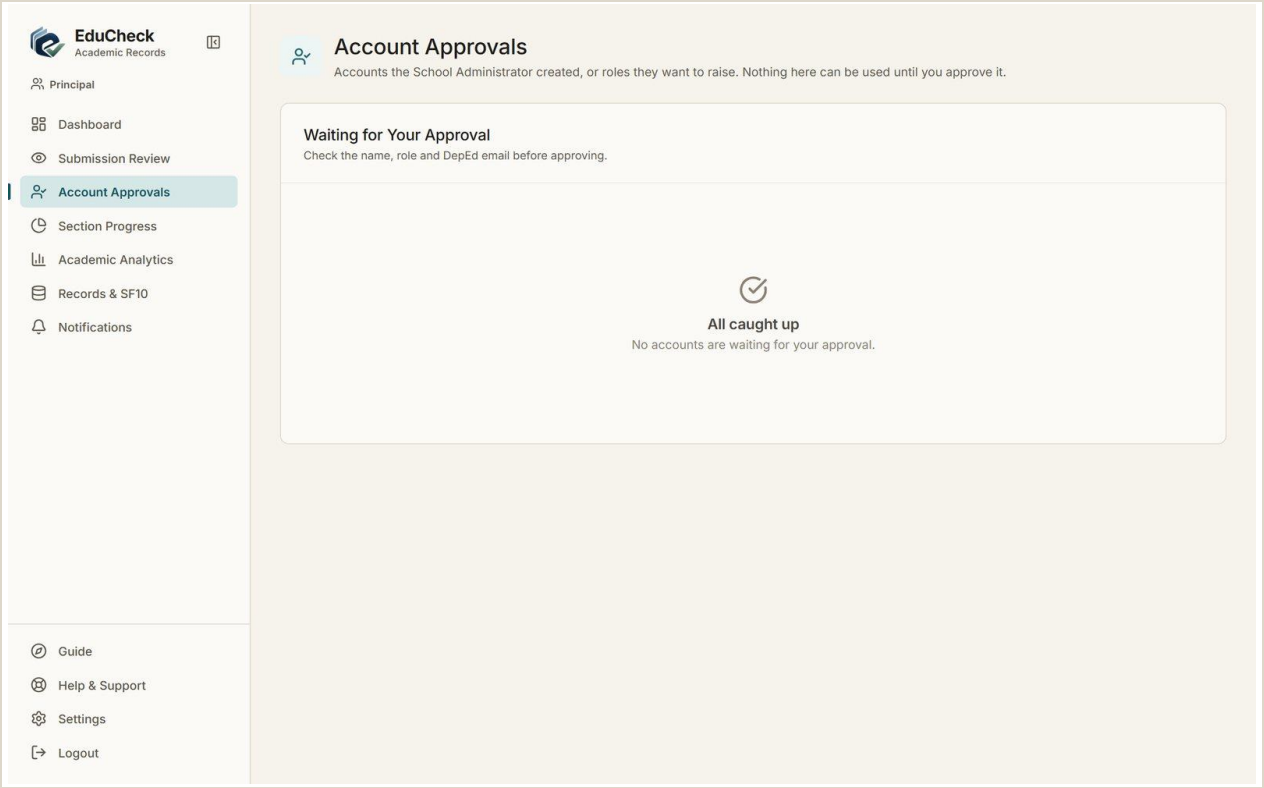

Figure 28. *Account Approvals with nothing waiting*

1. Check the person's name, role and DepEd email.
2. Click **Approve**. To reject, click **Reject**, type the reason and click **Confirm Reject**; the reason is shown to the School Administrator.
3. An approved new account still needs the Administrator to finish its setup before the person can sign in.

6.3 Viewing records and analytics

- **Submission Review** shows each learner's consolidated record and its approval status (view-only).
- **Section Progress** shows where each section's uploads and submissions stand.
- **Academic Analytics** shows grade distributions, subject performance and learners who may need intervention.
- **Records & SF10** finds any learner and opens their permanent record.

7. Troubleshooting

Problem	What to do
I forgot my password.	Ask the School Administrator to reset it. A temporary password is sent to your DepEd email (check the spam folder), and you replace it when you sign in.
"Too many login attempts"	Sign-in is paused after 10 wrong attempts in 15 minutes. Wait 15 minutes, then try again with the correct password.
Sign-in takes a long time.	On a hosted server, the first sign-in after a quiet period can take up to a minute while the server starts. Keep the page open.
A subject or section is missing on the upload page.	You are not assigned to it. Ask the School Administrator to add the assignment.
My file was refused as the wrong subject.	The subject in the file's header (INPUT sheet, cell Y7) must match the subject you selected.
Some learners were "not updated".	Their records are Pending Approval or Approved, so they are locked. The Class Adviser must request a revision first.
A learner cannot be submitted.	Every subject must be Validated with a final grade for every term, and no subject may be waiting for a revision. EduCheck lists what is missing.
The SF10 says there is nothing to put on it yet.	A year is printed only after it is Approved. Earlier years can be added or imported on the SF10 page.
A section or account cannot be deleted.	It already has records, which EduCheck keeps. Set an account to Inactive instead.
Notifications don't reach my phone.	The mobile app checks for new notifications only while it is open.

For anything else, open **Help & Support** in EduCheck, or contact your School Administrator. Mention the page you were on, the subject and section, and any message you saw.
